

SHAIK MD SURAIM

Tirupati, Andhra Pradesh

+91 9032016038 | balusuraim123@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI/ML & Frontend Developer experienced in building AI-powered web applications using React.js, TensorFlow, and Generative AI APIs. Skilled in responsive UI development, API integration, and intelligent healthcare-focused solutions.

EDUCATION

Mohan Babu University <i>Bachelor of Technology in Computer Science and Engineering — CGPA: 8.8/10</i>	Tirupati, Andhra Pradesh 2023 – 2027
Sri Chaitanya Junior College <i>Board of Intermediate Education, MPC — Percentage: 84%</i>	Andhra Pradesh 2021 – 2023
Sri Chaitanya School <i>Board of Secondary Education — Percentage: 97%</i>	Andhra Pradesh 2020 – 2021

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C, HTML5, CSS3
Frameworks & Libraries: React.js, TensorFlow, PyTorch, Flask, NumPy, Pandas, Scikit-learn, OpenCV, Matplotlib, Tailwind CSS
Tools & Technologies: Git, GitHub, REST APIs, VS Code, Gemini API, OpenStreetMap API
Cloud & Deployment: AWS, Netlify

EXPERIENCE

Artificial Intelligence Intern <i>Codec Technologies Pvt. Ltd. — Remote</i>	Sep 2025 – Oct 2025
- Completed an AICTE-approved Artificial Intelligence internship focused on machine learning workflows, image classification, and model evaluation techniques. - Developed an image classification application using Convolutional Neural Networks (CNNs) with TensorFlow and Keras for fruit and vegetable recognition. - Performed data preprocessing, model training, and evaluation on image datasets to improve classification accuracy. - Built a Streamlit-based interface for interactive real-time image classification demonstrations.	

PROJECTS

Hack2Care – AI Emergency Response Platform <i>React.js, TypeScript, Tailwind CSS, Node.js, Gemini API</i>
- Developed an AI-powered emergency response web application that provides real-time first aid guidance during road accident scenarios using Gemini API integration. - Built responsive multilingual emergency-assistance interfaces using React.js, TypeScript, and Tailwind CSS. - Integrated geolocation and OpenStreetMap APIs for nearby hospital identification and live map visualization. - Designed decision-based patient assessment workflows for emergency response prioritization. - Implemented animated CPR guidance interfaces for emergency assistance.
Fruit & Vegetable Image Classification <i>TensorFlow, Keras, Streamlit, OpenCV</i>
- Developed a CNN-based image classification model using TensorFlow and Keras for fruit and vegetable recognition. - Performed dataset preprocessing, model training, and built a Streamlit interface for real-time predictions.
Spotify Web Player Clone <i>HTML5, CSS3</i>
Developed a responsive Spotify-inspired web interface using HTML5 and CSS3 with modern UI design principles.

ACHIEVEMENTS & LEADERSHIP

- Secured **Top 10 position** in the GDG Tech24 Hackathon at Mohan Babu University among 30+ teams.
- Volunteered as part of the **NSS Discipline Committee** for organizing college events and social initiatives.
- Participated in AI and web development hackathons focused on real-world problem-solving applications.
- Attended an Artificial Intelligence workshop at **BITS Hyderabad**.
